

Today's Saving = Tomorrow's Success

Planning for your future doesn't have to involve struggle and sacrifice. But it does require some planning and know-how. That's where we can help.

RETIREMENT BY THE NUMBERS

So, how much money will you need to live comfortably once you retire? It depends on your unique situation, but here are some general rules to guide you:

$$\text{Your desired retirement income} \div 4\% = \text{How much money you need to retire}^*$$

For example, if your perfect retirement salary is **\$80,000**:

$$\mathbf{\$80,000 \div 4\% = \$2,000,000}$$

\$2,000,000 is your magic retirement number!*

If you haven't started thinking about retirement, you're not alone (but that's no excuse!).

THE 411 ON THE 401(K)

The Salesforce 401(k) is an easy and convenient way to save for your future. Here's how it works:

<p>If you're 50 or older, you can make what's called catch-up contributions, up to \$6,000 each year.</p>	<p>Set it and forget it. Enroll in the Annual Increase Program to automatically increase your contribution amount election each year.</p>	<p>Keep contributing to let your account grow tax-free and let the power of compound interest do the work.</p>
<p>Choose from several professionally managed funds, or opt for a self-managed account through Fidelity.</p>	<p>Make contributions either pretax or post-tax (Roth account).</p>	<p>Withdraw money with no penalty when you reach age 59 1/2. If you take a loan or withdraw money before then, you'll pay a penalty and taxes on that amount.</p>
